

FOR IMMEDIATE RELEASE

Continuing the Legacy: MartinLogan Unveils New Dynamo® Foundation, Dynamo®, and Abyss® Subwoofers

Raleigh, North Carolina: MartinLogan, a pioneer in high-performance audio technology, is excited to announce the launch of its latest subwoofer lineup. Featuring the Dynamo® Foundation, Dynamo® and Abyss® Series, this new lineup is poised to be a benchmark in compact bass performance, offering a diverse array of advanced features and masterful artistry.

"We're thrilled to offer high-quality audio solutions at an exceptional value while preserving everything that makes MartinLogan unique," said **Allan Tarrant, Senior Vice President** of MartinLogan. "Our newest subwoofers exemplify our commitment to innovation and excellence in audio engineering. With their design for seamless integration with any brand of speaker, they are a versatile choice that enhance any home audio system."

"We are excited to bring powerful, precision bass into homes in a way that complements any environment," said **Andrew Lindsey, Product Manager** at MartinLogan. "Each model has been meticulously engineered to deliver a unique sonic and visual experience."

Dynamo® Foundation Series: Powerful. Compact. Precise.

The MartinLogan Dynamo® Foundation Subwoofers have been engineered to deliver superior audio quality, combining advanced technology with sophisticated design to enhance home entertainment experiences. These subwoofers integrate high-performance components typically reserved for high-end audio systems, making exceptional sound quality accessible to a wider audience.

Key Features and Benefits of the Dynamo® Foundation Series:

- **Superior Audio Quality:** Engineered for exceptional sound, integrating advanced technology and sophisticated design for an incredible home entertainment experience at an exceptional value.
- **High-Resolution DSP Engine:** Features a 200MHz DSP engine with 56-bit processing, typically found only in high-end audio systems, ensuring each note and beat is reproduced with remarkable clarity and precision.
- **Powerful Magnitude® Amplifiers:** Equipped with MartinLogan's exclusive Magnitude® 400 or 700 amplifiers, delivering up to 400W and 700W peak power respectively, for clean, impactful bass and effortless musicality.
- **Custom-Designed URP Woofers:** 10" or 12" Ultra-Rigid Polypropylene (URP) woofers tuned to perfection, delivering robust, deep bass with minimal distortion, even at high volumes.
- **Seamless Integration:** Compact, grille-less, down-firing design that blends seamlessly into any decor, enhancing both living room audio and dedicated home theater setups.

Truth in Sound

- **Versatile Connectivity:** Offers LFE input for easy home theater setup and Stereo RCA inputs for compatibility with various audio equipment.
- **Uncompromising Bass:** Designed to complement MartinLogan Motion Foundation Series systems and other brands, offering high-performance, low-distortion bass at a remarkable value.
- **Advanced Engineering:** Utilizes state-of-the-art Klippel analysis and rigorous engineering to ensure pristine sound, free from distortion and artifacts, for a fully immersive audio experience.
- **Optional Wireless Kit:** The WSK-1 Wireless Subwoofer Kit (sold separately) allows for hassle-free wireless installation, eliminating the need for cumbersome cables and providing placement flexibility.

Dynamo® Series: Impeccable Precision, Indisputable Quality.

The new Dynamo® Series Subwoofers echo one of MartinLogan’s most popular products of all time – the original Dynamo® subwoofer. Renowned for its flawless precision and compact elegance, this timeless icon has now been reimagined. The Dynamo® Series breathes new life into that legacy, melding the classic virtues with modern technologies and innovations.

Key Features and Benefits of the Dynamo® Series:

- **Seamless Integration:** Blending high performance with decor-friendly aesthetics, the Dynamo® is crafted to complement any speaker system while perfectly aligning with MartinLogan’s thin-film technologies.
- **High-Output, High-Precision Aluminum Woofers:** 10” or 12” Aluminum Woofers meticulously tuned with advanced Klippel analysis, delivering powerful, distortion-free bass in a compact design.
- **Powerful Magnitude® Amplifiers:** MartinLogan’s proprietary Magnitude® 1kW in the Dynamo® 10 delivers up to 1000W Peak (500W RMS) for impactful sound, while the Magnitude® 1.6kW in Dynamo® 12 offers a stunning 1600W Peak (800W RMS) for deep, clear bass.
- **Ultra High-Resolution DSP Engine:** Class-leading 500MHz DSP engine with 64-bit processing, enabling complete audible transparency for all advanced DSP functions for maximum output and fidelity.
- **Reinforced Cabinet Design:** Featuring a sealed, 1” thick medium-density fiberboard (MDF) cabinet with additional MDF reinforcement on the woofer baffle for highly articulate and accurate bass performance.
- **Integrated Anti-Vibration Feet:** A sleek solution that improves system dynamics by reducing vibration transfers into adjoining rooms, fitting all flooring types.
- **Intuitive App Control:** Effortless control with MartinLogan’s Subwoofer Control app for iOS and Android, offering three customizable modes – Movie, Music, or Night.
- **Built-in Wireless Receiver and Transmitter** for a clutter-free setup, ensuring lossless sound transmission and low latency.
- **Robust Connectivity:** Dynamo® 10 and 12 offer incredible installation flexibility with both RCA and XLR LFE inputs, Stereo RCA inputs, Speaker Level inputs, and Sub Out connections. Simultaneous connections are also supported.
- **Compatible with the award-winning Anthem Room Correction (ARC®) system,** ensuring custom equalization, tuning and calibration to achieve highest levels of bass impact.

Abyss® Series: Supercharged Performance, Miniaturized Size.

Nearly two decades ago, MartinLogan introduced the Abyss®, a larger and more powerful successor to the original Dynamo® subwoofer. Renowned for its deep, articulate bass, the Abyss® Series continues that legacy, blending the best of past innovations with a contemporary twist.

Key Features and Benefits of the Abyss® Series:

- **Compact, Precision Sound:** Seamlessly blends audiophile musicality and theatricality with dynamic output and accuracy in an ultra-compact design.
- **Big Impact, Small Footprint:** Utilizes an 8" or 10" Hybrid Woofer System, which combines an active Aluminum woofer with two Aluminum passive radiators. This design enhances output and reduces distortion akin to ported designs, yet preserves the compact size and tighter bass associated with sealed enclosures.
- **Magnitude® Amplifiers:** The Abyss® 8 features the Magnitude® 1kW amplifier with up to 1000W Peak (500W RMS), while the Abyss® 10 boasts the Magnitude® 1.6kW amplifier, delivering an impressive 1600W Peak (800W RMS) of clean, powerful bass.
- **Ultra-High Resolution DSP Engine:** Equipped with a class-leading 500MHz DSP with 64-bit processing for audible transparency of all advanced DSP functions for maximum output and fidelity.
- **Reinforced Cabinet Design:** Incorporates a sealed, 1" thick MDF cabinet with center brace and reinforced woofer baffles to deliver articulate and precise bass performance.
- **Integrated Anti-Vibration Feet:** A sleek solution that improves system dynamics by reducing vibration transfers into adjoining rooms, fitting all flooring types.
- **Effortless App Control:** The MartinLogan Subwoofer Control App for iOS and Android allows ease of tuning from the comfort of your seat.
- **Integrated Wireless Receiver and Transmitter** for a clean setup, ensuring both lossless sound transmission and minimal latency.
- **Robust Connectivity:** Abyss® 8 and 10 offer incredible installation flexibility with both RCA and XLR LFE inputs, Stereo RCA inputs, Speaker Level inputs, and Sub Out connections. Simultaneous connections are also supported.
- **Supports the award-winning Anthem Room Correction (ARC®)** for tailored equalization, tuning, and calibration to maximize bass impact.

Available Models and Pricing:

- **Dynamo® Foundation 10:** Brushed black Vinyl with High-Gloss Top - \$499.99 USD
- **Dynamo® Foundation 12:** Brushed black Vinyl with High-Gloss Top - \$699.99 USD
- **Dynamo® 10:** Gloss Black or Satin White - \$999.99 USD
- **Dynamo® 12:** Gloss Black - \$1,499.99 USD
- **Abyss® 8:** Gloss Black or Satin White - \$1,199.99 USD
- **Abyss® 10:** Gloss Black - \$1,699.99 USD
- **Wireless Subwoofer Connection Kit** - \$99.99 USD

In the Dynamo® Foundation Series, the Foundation 10 is currently in stock for immediate shipping, with Foundation 12 slated to be available in early September 2024. The Dynamo® and Abyss® Series will be available in mid-October 2024.

Visit MartinLogan at Audio Advice Live 2024
