

Paradigm®
PREMIER™
SERIES V2

Performance isn't learned.
It's inherited.

Elevate your listening experience with the reimagined Premier v2:
the new benchmark for value in the high-performance category.

The Performance Benchmark

The Premier Series v2 is more than a next-generation release; it is the definitive performance benchmark in its class. Designed as a sophisticated gateway to near-reference quality sound, this series offers an approachable entry point into high-end audio for those seeking a significant upgrade from standard systems. We have engineered the v2 to act as the conduit between everyday home audio and the pinnacle of acoustic fidelity, delivering a clear pathway for listeners to experience music and film with a level of precision and immersion previously unattainable at this price point.

At the heart of this series is a core Paradigm philosophy:

*“There is no value
in the absence of
performance.”*

This conviction drives every engineering decision we make. It's why we've integrated flagship-inspired technologies—like the AL-MAC™ high-frequency drivers and Carbon-X™ unibody bass drivers—into a series that remains within reach. By focusing on technical excellence over unnecessary complexity, the Premier v2 ensures that every design element serves a singular purpose: delivering an authentic, high-performance listening reality that honors the artist's original intent.

Decades of Innovation. Engineered for Excellence.

For over 40 years, Paradigm has set the standard for high-performance audio through a commitment to rigorous research and world-class engineering. Our heritage is built on the belief that everyone should have access to exceptional sound. Every speaker in the Premier v2 series is designed, engineered, and overseen by our team at our headquarters in Canada, ensuring our flagship DNA is reflected in every component we create.

The Premier v2 brings the laboratory to the living room. By distilling the groundbreaking technologies of our flagship systems into a more accessible format, we've created a series that strips away the barriers between standard playback and true reference-grade fidelity. Choosing Paradigm means inheriting decades of award-winning engineering and a relentless passion for performance that defines its class.

Premier Series v2

High-Fidelity Unleashed. High-Value Defined.

Premier 720F v2 Floorstanding

*Compact Elegance.
Reference Authority.*

The 720F v2 brings the scale of a floorstander to a space-friendly footprint. This 3-way design introduces dual Carbon-X™ unibody bass drivers to handle low-frequency duties with maximum rigidity. Combined with a dedicated AL-MAG™ midrange and AL-MAC™ tweeter, it delivers a seamless, high-output performance supported by adjustable Outrigger Shock-Mount feet for total acoustic isolation.

Premier 820F v2 Floorstanding

*Commanding Power.
Reference Scale.*

The 820F v2 is engineered for the ultimate home theater or high-end stereo system. Featuring larger 7" Carbon-X™ bass drivers and a high-volume enclosure, it provides the massive air movement required for visceral, controlled bass and expansive soundstaging. It delivers a powerful, lifelike performance that honors the artist's original intent at every volume level.

Premier 520LCR v2 (LCR Left/Center/Right)

*Unmatched Versatility.
Seamless Integration.*

The 520LCR v2 is a dedicated Left/Center/Right solution designed for high-performance theater. Its acoustic suspension (sealed) design allows for flexible placement in cabinets or freestanding without compromising clarity. A Coaxial AL-MAG™ midrange ensures clear dialogue and precise imaging, creating a seamless front stage with balanced, natural sound.

Premier 620C v2 Center Channel

*Cinematic Clarity.
Absolute Authority.*

Designed for large-scale cinema, the 620C v2 is the ultimate center channel. It utilizes a 4-driver array supported by dual passive radiators to deliver deep, impactful low-end while maintaining the sealed cabinet benefits for cabinet placement. This configuration ensures crystal-clear dialogue and an authoritative presence that anchors the largest home theater systems.

Premier 120B v2 Bookshelf

*Compact Precision.
Reference Performance.*

The Premier 120B v2 is the ideal entry point into audiophile-quality sound for space-conscious environments. This 2-driver bookshelf speaker utilizes the AL-MAC™ tweeter and AL-MAG™ mid-bass driver to deliver a detailed, immersive soundstage that far exceeds its size. Perfect as a high-performance stereo pair or the foundation of a compact theater.

Premier 220B v2 Bookshelf

*Expanded Scale.
Reference Authority.*

Building on the precision of the 120B, the 220B v2 features a larger 6" AL-MAG™ driver and an increased cabinet volume. This translates to deeper bass extension and wider dynamic range, allowing it to remain authoritative in larger rooms. It is the definitive choice for listeners seeking floorstanding-caliber performance in a versatile bookshelf format.

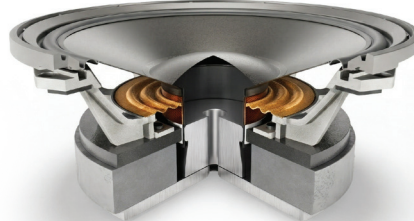

Engineered with Flagship DNA

True excellence is inherited. The Premier v2 features an elite suite of “trickle-down” technologies—innovations forged for our higher-tier ranges and now optimized for this series. By integrating these proven, high-end components, we have created a series that offers staggering performance and a taste of our ultimate engineering pedigree.

AL-MAC™ High-Frequency Drivers

A sophisticated blend of aluminum, magnesium, and ceramic that is lightweight, rigid, and resistant to resonance for detailed, lifelike high frequencies.

AL-MAG™ Midrange Drivers

Crafted from aluminum and magnesium to provide the agility and precision required for natural vocals and instruments.

Carbon-X™ Unibody Bass Drivers

Single-piece unibody cones designed for maximum strength and minimal mass, delivering deep and controlled bass even at high volumes.

OSW™ Waveguide

The Oblate Spherical Waveguide precisely shapes output to focus sound on the listening area while reducing unwanted room reflections. By focusing the sound directly on the “sweet spot” and minimizing ceiling and wall reflections, you get a clear, focused image regardless of your room’s acoustics.

Patented PPA™ Lens

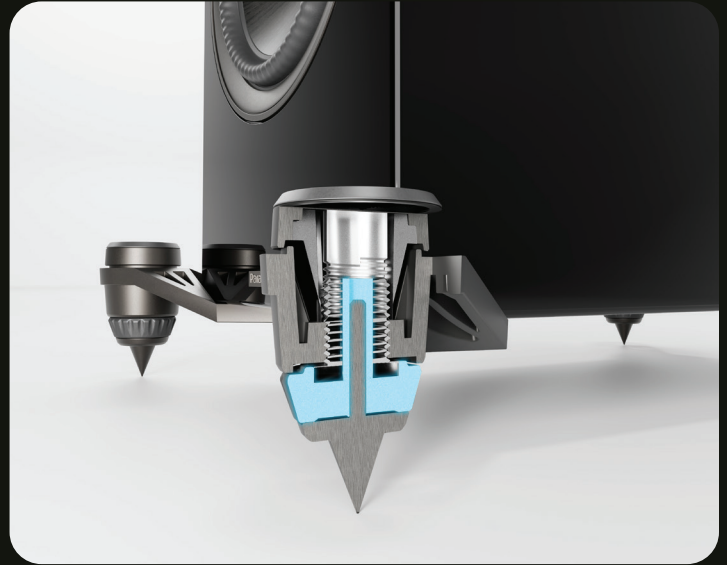

Our Perforated Phase-Aligning lens ensures all frequencies reach your ears simultaneously, significantly improving realism and detail. It acts as a physical shield and an acoustic filter, blocking out-of-phase frequencies. You’ll notice a significant leap in the “three-dimensionality” of the soundstage.

A Foundation for Precision:

Outrigger Shock-Mount Isolation Feet

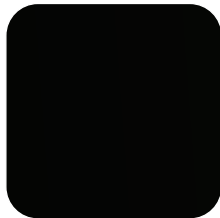

Stability You Can Hear. To deliver a true high-performance experience, the Premier v2 floorstanding models utilize adjustable Outrigger Shock-Mount Isolation Feet. This flagship-inspired system decouples the speaker from the floor, effectively controlling vibrations and resonance that can muddy your audio. By isolating the cabinet, you experience a cleaner, more detailed soundstage and tighter bass across any surface.

Every Premier v2 floorstander includes both precision machined spikes for carpets and protective rubber caps for hard surfaces, ensuring your floors remain as pristine as your audio.

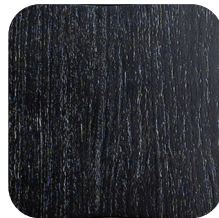

Refined Craftsmanship

Performance of this caliber belongs in a silhouette that commands attention. With premium painted finishes, authentic real wood veneers, sleek aluminum and stainless steel trim, the Premier v2 is designed to elevate your living space while providing a lasting testament to Paradigm's heritage of excellence.

Piano Black

The Mirror-Finish Icon.

Black Walnut

Monochromatic Elegance.

Walnut

Timeless Heritage.

Satin White

Contemporary Chic.

*Exclusively available for the
Premier 120B & 520LCR.*

Beyond the beauty, these aren't just boxes. Each cabinet is constructed from MDF and internally braced to be acoustically inert. Whether you choose the deep gloss of Piano Black or the textured warmth of Walnut, the finish protects a rock-solid enclosure designed to eliminate cabinet colorations, leaving the drivers free to deliver the performance exactly as the artist intended.
